

ROMSON NATHANIEL

Uttar Pradesh, India | 9140882037 | romsonnathaniel123@gmail.com | [GitHub](#)

EDUCATION

Institute of Technology and Management | Gorakhpur, UP

Bachelor of Technology in Artificial Intelligence and Machine Learning

Relevant Coursework: Software Engineering, Machine Learning, Algorithms, Artificial Intelligence, Data Structures

CERTIFICATIONS

[Internship in Python Programming](#) | NIELIT, Gorakhpur

July 2025 - August 2025 | Grade: S (80% and above)

Completed 4-week online internship covering Python fundamentals, data types, conditional statements, loops, sequence data types, user-defined functions, modules, regular expressions, file handling, exception handling, NumPy, Pandas, Matplotlib, SQL Lite connectivity, and GUI programming.

TECHNICAL SKILLS

Programming Languages: C/C++, Python, JavaScript, Java, SQL

Web Technologies: HTML, CSS, React.js, Node.js, Express.js, Flask, REST APIs

Databases: MongoDB, MySQL, SQLite

Libraries & Frameworks: TensorFlow, PyTorch, Pandas, NumPy, Matplotlib, OpenCV, Scikit-Learn

Tools & Platforms: Git, GitHub, Linux, Windows, VS Code, Postman

Core Skills: Full Stack Development, Machine Learning, Natural Language Processing, Data Science, Deep Learning, LLMs, API Integration, Responsive Design

PROJECTS

[Hiring Dashboard - Full Stack Recruitment System](#) | Node.js, Express.js, MongoDB, React.js

- Built a full-stack hiring dashboard with a Kanban-style pipeline for tracking candidates across five hiring stages, using React, Node.js, Express, and MongoDB
- Designed RESTful CRUD APIs with server-side validation for candidate records, paired with a React interface for adding, advancing, and rejecting candidates in real time

[Encore - Event Booking Platform](#) | React.js, Node.js, Express.js, MongoDB, Razorpay

- Built full-stack event booking platform with time-slot scheduling and real Razorpay payment integration in test mode, using React, Node.js, Express, and MongoDB
- Engineered atomic MongoDB updates to prevent double-booking of event slots under concurrent requests, and implemented HMAC signature verification to confirm payment authenticity before confirming a booking

[Authentication System - Secure Login Platform](#) | Node.js, Express.js, JWT, Bcrypt

- Built a secure authentication system with user registration, duplicate-email checking, bcrypt password hashing, and JWT-based login with token expiration
- Implemented Express middleware to verify JWTs on protected routes, and built a React frontend that only renders a user's dashboard after validating their session against the API

[Meridian - Full Stack E-Commerce Platform](#) | React.js, Node.js, Express.js, MongoDB, JWT

- Built full-stack e-commerce application with product catalog, persistent cart, and checkout flow, featuring JWT-based authentication and role-based access control for customer and admin roles
- Designed RESTful APIs with Express and MongoDB for order management and inventory tracking, and built an admin dashboard for product CRUD and order status control

ADDITIONAL SKILLS

Problem-Solving • Adaptability • Time Management • Team Collaboration • Growth Mindset • Communication • Agile Development
